

I am writing in response to the proposal that LPFM stations would be allowed to have priority over national or regional radio stations. My family listens to AIR 1, a national radio station that is aired on 89.5 in the St.Cloud, MN area. This radio station has greatly benefited my community in that it is the ONLY radio station available that plays contemporary christian music. While there are other christian radio stations available in the area, AIR 1 is by far the more preffered one with the young adults and teenagers. I encourage you to allow national and regional radio stations using translators to keep their priority.
